Computer Engineering student (CGPA 9.42) with strong foundations in Java, Android development, and SQL. Built full-stack and mobile applications with focus on clean architecture, offline-first design, and scalable data management. Seeking software engineering opportunities to apply problem-solving skills in real-world systems.

Education:

Vivekanand Education Society's Institute of Technology (VESIT)
Bachelor of Engineering(B.E)-Computer Engineering | 2027 expected

- Current CGPA : 9.42 (Till Sem VI)
- Relevant Courses: Data Structures & Algorithms, Object-Oriented Programming , Operating system, Database Management System, Computer networks.

I.D.U.B.S Junior College Of Science and Commerce

Higher Secondary Certificate (12th) | 89.67% | May 2023

- Relevant Scores : Mathematics : 97/100 , Computer Science : 197/200

Relevant Projects:

E-Book Management System[GITHUB]

Freelance Project — delivered for a client
Tech Stack: Java 11, JSP, Servlets, Jakarta EE, MySQL 8.0, JSTL, Bootstrap 5, Maven, Apache Tomcat, Cloudinary, JavaMail
Description: Developed a full-stack e-commerce platform for book inventory management, customer transactions, and admin operations with secure authentication and modular architecture.
Key Contributions:

- Built end-to-end purchase workflow with shopping cart, multi-method checkout, order tracking, and automated email confirmations using JavaMail integration
- Designed role-based access control separating customer and admin operations including inventory management, order fulfillment, and stock monitoring
- Implemented DAO pattern for data persistence with optimized MySQL queries supporting product catalog, filtering, search, and transaction history retrieval
- Integrated Cloudinary for cloud-based image storage reducing storage overhead and improving media delivery performance across customer-facing product pages

MoveMate — Android Fitness Tracking App [GITHUB]

Tech Stack: Java, Android, Firebase Firestore, SQLite, MVC/MVVM
Description: Developed a comprehensive Android fitness tracking application enabling users to log runs, monitor personal stats, and achieve fitness goals with real-time cloud sync and offline support.
Key Contributions:

- Implemented dual-database architecture using SQLite for offline run logging and Firebase Firestore for real-time cross-device synchronization, ensuring zero data loss in low-connectivity scenarios.
- Built interactive dashboard and stats screens displaying distance, pace, personal bests, and goal progress with MVC/MVVM architecture for clean separation of concerns.
- Engineered community leaderboard, goal tracking system, and automated notification service using Android WorkManager for scheduled reminders and goal-check alerts.
- Integrated weather API to provide pre-run weather context and implemented Firebase-backed community features for runner engagement.

Extracurricular:

Jr.Public Relations Officer at CSI VESIT (2024-2025).

- Designed Multiple Social Media Posts.
- Helped in Organization Planning.

Skills & Technologies: Java, Python, MySQL, DSA, DBMS, REST APIs , Git/GitHub, Operating Systems, Computer Networks, Android Development, Machine Learning

Certificates: Java Programming-MOOC, Winter Internship At VESIT, Frontend Developer internship at Code Alpha, Frontend Developer of Month at CodeAlpha (September 24).

Additional Skills: Canva, Figma, AutoCad.
